Introduction to Philosophy of the Human Person
Mid Performance Task # 03

"MEME IT OR MEAN IT"

Submitted by.
(Surname, First Name, Middle Initial)

Grade and Section

Group #

Teacher's Name
Buhisan, Christian P.

Date Submitted

General Guide:

Each group will select **one logical fallacy; it can** be one of the discussed types or beyond class discussion and **find a real-life statement, quotation, speech excerpt, interview response, social media post, or public statement** that demonstrates the chosen fallacy.

The statement must contain the exact words of the person being represented. Groups will then **transform the statement into an original meme** that creatively exposes and analyzes the faulty reasoning behind it.

The purpose of the activity is not to mock or attack individuals, but to critically examine public statements, arguments, and ideas.

Procedural Guide:

STEP 1: CHOOSE A FALLACY

- **Choose one logical fallacy discussed in class.**

  Study its:
  - *Formula or pattern;*
  - *Characteristics;*
  - *Rationale.*

STEP 2: FIND A REAL STATEMENT

- **Find a real statement made by a real person that demonstrates your chosen fallacy.**

  The statement may come from:
  - *Public speeches;*
  - *Interviews;*
  - *Debates;*
  - *News reports;*
  - *Social media posts;*
  - *Advertisements;*
  - *Public discussions.*

The quotation used in the meme must remain accurate to the original statement. Do not change the person's words merely to make the statement appear more fallacious.

STEP 3: MEME IT

- ***Transform the real statement into an original meme.***

  Your meme should creatively highlight the argument or reasoning being presented while preserving the person's exact words.

  Do not include the name of the fallacy in the meme.

STEP 4: EXPLAIN

- *At the back part of your meme you will there the following:*
  - *What was the original context of the statement?*
  - *Who made the statement?*
  - *What exact statement demonstrates the fallacy?*
  - *What fallacy is committed?*
  - *What formula or pattern does it follow?*
  - *Why is the reasoning considered fallacious?*
  - *What is your proof that the statement was made by the person?*
  - *Why is it important for people to recognize this kind of fallacy in real-life discussions (Group Conclusion)*

Criteria	Exceeds Expectations (5)	Meets Expectations (4)	Approaching Expectations (3)	Below Expectations (2)	Did Not Meet Expectations (1)	Weight / Multiplier
Fallacy Identification & Logical Analysis	Correctly identifies the fallacy and provides a clear, accurate, and convincing analysis of its formula/pattern and why the reasoning is fallacious.	Correctly identifies the fallacy and provides a clear analysis, with only minor gaps in explaining the pattern or reasoning.	Identifies the fallacy correctly but the explanation of its pattern or faulty reasoning is basic or somewhat unclear.	Shows partial understanding but misidentifies or inadequately explains the fallacy and its reasoning.	Fails to identify the fallacy correctly or provides little to no meaningful analysis.	15 pts / ×3
Context, Accuracy & Evidence	Provides complete and accurate context, preserves the person's exact words, clearly identifies the speaker, and provides credible proof/source that the statement was actually made.	Provides accurate context and quotation with a credible source, with only minor missing details.	Provides generally relevant context and evidence, but some details, sourcing, or contextual information are incomplete.	Provides limited or questionable context/evidence, or the quotation has noticeable inaccuracies.	The statement is unsupported, fabricated, significantly altered, or lacks sufficient evidence of its origin.	15 pts / ×3
Meme Creativity & Communication	The meme is highly creative, appropriate, and effective in visually communicating the faulty reasoning while preserving the original statement. It is engaging without becoming a personal attack.	The meme is creative and clearly communicates the faulty reasoning while remaining appropriate and respectful.	The meme communicates the general idea but has limited creativity or does not clearly highlight the faulty reasoning.	The meme has limited connection to the fallacy, relies heavily on humor, or may distract from the intended analysis.	The meme fails to communicate the fallacy or primarily mocks/attacks the individual rather than examining the reasoning.	10 pts / ×2
Critical Reflection & Group Conclusion	Provides a thoughtful and well-developed explanation of the fallacy's significance and clearly explains why recognizing fallacies is important in real-life discussions.	Provides a clear reflection on the importance of recognizing fallacies, with adequate explanation.	Provides a relevant but basic reflection with limited depth.	Reflection is vague, incomplete, or only loosely connected to the purpose of the activity.	Provides little to no meaningful reflection or conclusion.	10 pts / ×2
